AEI at Wire & Cable India 2012 Booth 1D60

Associated Engineers & Industrials Limited (AEI) is one of the leading manufacturers of cable machinery from India. With a continuous presence of 41 years, AEI specialises in the design and manufacture of RIGID STRANDING MACHINES.

AEI stresses on continuous technical innovation and tailor made design as absolutely essentials to keep the company's technology ahead of competition. AEI machines use the best available materials and workshop practices to guarantee stranding machines that raise industrial productivity, enhance product quality, and ensure long-term machine reliability.

At Wire & Cable India 2012 (Booth 1D60) AEI will be showcasing a new generation high speed ASRB/E standers, a result of the integration of top quality mechanical craftsmanship with the latest generation control systems. The intelligent stranders incorporate features such as electronic shaft synchronisation (including during power failure), individual wire break detectors, auto regulated pneumatic bobbin brakes, motorised pintles, remote diagnostics and fully automatic floor / trolley loading devices.

Other recent innovations including Trapezoidal Wire (TW) Heads for the manufacture of new generation preshaped wire conductor and completely redesigned Prespiral Sector Heads for higher precision Milliken conductor for 2500mm² x 400 kV EHV cables shall be showcased.
